SUMMARY

XR Developer with 3+ years of experience specialising in intuitive and creative spatial interaction design and development. Passionate about combining storytelling with cutting-edge XR technology to create immersive and engaging user experiences. Skilled in Unreal, Unity Engine and AI integration, with a proven track record of leading projects from ideation to launch, achieving multiple awards and recognitions.

SKILLS

Program Languages:	C#, C++, Python, Javascript, HTML, CSS
Game Engines:	Unity, Unreal Engine
XR Technologies:	Meta Quest2/3/Pro, AR Core/Foundation, Spark AR, Motion Capture
Frameworks:	Openframeworks, Processing
AI Tools:	Comfy UI, Midjourney, Runway, Stable Diffusion
Software/Tools:	Blender, Maya, Figma, Adobe Photoshop, Illustrator, Premier Pro
Version Control:	Perforce, Git, Github, Plastic SCM

EXPERIENCE

10/2022 – present **XR Developer** — **No Ghost (London, United Kingdom)**

- Developed high-quality VR/MR applications in Unreal Engine (C+/Blueprints) and Unity (C#), delivering polished, interactive experiences for Meta Quest and mobile platforms. Successfully shipped 6+ XR projects in collaboration with internal teams and external partners.
- Worked on AI/XR development for Built by Music, a live 6-user multiplayer MR exhibition. Worked on R&D with Shape of Motion and Wild Gaussian for video-based scene reconstruction and transitioned these tools into production. Built AI-assisted workflows using Stable Diffusion, NeRF, Gaussian Splatting, SAM2, ComfyUI, and Python automation to accelerate MR environment creation.
- Contributed to *Wallace & Gromit: The Grand Getaway*, implementing core gameplay and interaction systems and optimising performance across Quest devices. The project was nominated for the 2024 Emmy Awards and 2023 Venice Immersive.
- Implemented key MR features for *Space Explorers*, including Spatial Anchor integration, persistent save/load systems, and real-world interaction logic for immersive mixed-reality scenarios.
- Designed and built intuitive MR interaction systems for the *Grow meditation app*, developing palm menus, grabbing interactions, State Tree logic, and save systems for an App Lab prototype.
- Contributed UI implementation and sequence work for Fortnite (*Death Star Sabotage Event* and *Draft Punk Concert*), collaborating closely with art, design, and cinematic teams.
- Implemented gameplay systems, localisation for 10 languages, UI Toolkit workflows, and mobile optimisation for the *Messi Football Game* on Android/iOS.

Unity Engine (C#) | Unreal Engine (C++, Blueprints) | Meta Quest | Android

10/2024 – 8/2025 **VR Developer, R&D Prototyper** — **KArts ATLab (Seoul, South Korea)**

Official Trailer

- Led AI + spatial storytelling R&D, integrating GPT, ElevenLabs, and gaze tracking for personalised real-time narrative experience.
- Developed a generative VR film 8pm and the cat using Unity, collaborating with artists and directors to transform R&D findings into an immersive cinematic experience, Venice Immersive 2025 Nominee & BFI London 2025 Official Selection

Unity Engine (C#) | OpenAI | Stable Diffusion | ElevenLabs | Meta Quest

4/2022 – 1/2025 **VR Developer, Researcher** — **Goldsmiths University of London | LASALLE College of Arts(Singapore)**

Frontiers paper link | IEEE VR 2023 poster link

- Developed a VR public speaking training app designed to reduce foreign language anxiety
- Validated with 40+ participants; secured £10,000 grant for extended research
- Published the extended research in Frontiers in VR (2025) and presented findings at IEEE VR 2023

Unity Engine (C#) | Meta Quest | Python | SPSS

4/2023 – 9/2023 **Creative Technologist** — **Noonssup (London, United Kingdom)**

Memory Journey Project Video | Memory Journey Project Website

- Executed the "Dream Archive Project," an AI-powered immersive art installation developed through the Korean government's Art and Technology Convergence Idea Planning and Implementation Project in 2023
- Presented the project at Musinsa Studio Hannam 1st Branch during a video screening event

Processing | Open AI

AWARDS & RECOGNITION

8/2025 **Venice Immersive 2025 &**
BFI London Film Festival Expanded 2025 Official Selection
Project Details
Selected for the official Venice Immersive and BFI London Expanded programs. Participated as Lead Developer, directing R&D prototyping, Unity development, and spatial interaction design for a 13-minute AI-driven VR film

10/2024 **Guest Lecture on Game Design (Catholic University of Korea)**
Lectured on game ideation, development processes, and XR case studies for undergraduate students.

9/2024 **2024 Metaverse Developer Contest (Seoul, South Korea)**
Project Walkthrough Video
Winner of the 2024 Metaverse Developer Contest, awarded by the Korea Metaverse Industry Association (submission out of 349 teams)

1/2023 - 9/2024 **Goldsmiths-LASALLE Partnership Innovation Fund**
A total of £10,000 funding recipient continuation of research project collaboration between Goldsmiths, University of London, and LASALLE College of the Arts. This grant supports ongoing efforts to explore reducing foreign language in a virtual reality environment.

9/2020 - 10/2020 **Travel the World (Incheon, South Korea)**
Exhibition Details
Solo exhibition in Incheon, South Korea, demonstrating digital travel illustrations)

EDUCATION

9/2021 - 9/2022 **Virtual & Augmented Reality (MSc)** **Goldsmiths, University of London (London, United Kingdom)**
- Graduated with Distinction. AR/VR project development and staying current with XR advancements

3/2015 - 6/2021 **Game & Interactive Media Convergence**
Chinese Langauge and Literature (BA) **Chung-Ang University (Seoul, Korea)**

LANGUAGES

English - fluent **Korean** - native **Chinese** - HSK5
