SUMMARY

XR Developer and Prototyping Engineer with 4+ years of experience shipping 8+ production XR applications across Unity, Unreal Engine, Apple Vision Pro, Meta Quest and mobile AR. I prototype AI-enabled spatial experiences that combine real-time 3D, LLMs, voice and gaze-based interaction to create intuitive, low-friction interfaces. My work spans Snap Spectacles prototyping, multimodal AI storytelling, published HCI research and Emmy-nominated XR projects, with a focus on smart glasses and wearable AI.

SKILLS

Program Languages:	C#, C++, Python, TypeScript, JavaScript, HTML, CSS
Game Engines:	Unity, Unreal Engine, Lens Studio
XR Technologies:	Meta Quest, Apple Vision Pro, Spectacles, 8th Wall, Motion Capture
Frameworks:	Openframeworks, Processing
AI Tools:	ComfyUI, Midjourney, Runway, Stable Diffusion
Software/Tools:	Blender, Maya, Figma, Adobe Photoshop, Illustrator, Premier Pro
Version Control:	Perforce, Git, Github, Plastic SCM

EXPERIENCE

10/2022 – present

XR Developer

No Ghost (London, United Kingdom)

- Shipped 8+ production-ready XR applications and multiple early-stage prototypes in Unreal and Unity Engine across Meta Quest, Apple Vision Pro, and mobile platforms, collaborating with partners including Meta, Epic Games, Aardman, Magnopus, PwC, City of Bradford, SquintOpera, and Flix & Paul Studios.
- Built early-stage XR and interactive gameplay prototypes, turning ambiguous briefs into playable demos within short R&D cycles to support client and funding pitches.
- Served as Lead Developer for a PwC Apple Vision Pro MR experience, owning system architecture, Unity development, task planning and technical delivery for an enterprise-facing prototype demonstrating AI agent monitoring and governance workflows.
- Developed AI-assisted MR workflows for *Built by Sound*, a live 6-user multiplayer MR exhibition, using Stable Diffusion, NeRF, Gaussian Splatting, SAM2, ComfyUI and Python automation to accelerate MR environment creation and transition scene-reconstruction R&D into production.
- Developed gameplay, interaction and sequencing systems for *Wallace & Gromit: The Grand Getaway*, collaborating across design, art and engineering teams; selected for Venice Immersive 2023 and nominated for the 2024 Emmy Awards..
- Designed and implemented spatial interaction systems for *Space Explorers* and the *Grow meditation app*, combining Spatial Anchors, environment-aware logic, palm menus, grab interactions, State Tree logic and persistent state systems to support real-world MR scenarios and low-friction hand-based UX.
- Contributed UI engineering, sequence implementation, and mobile optimizations for high-traffic shipped projects including Fortnite (*Death Star Sabotage Event* and *Daft Punk Concert*) and the *Messi Football Game*, collaborating closely with cross-functional design teams.

Unity Engine (C#) Unreal Engine (C++, Blueprints) Meta Quest Apple Vision Pro Android iOS

10/2024 – 8/2025

Lead Developer, R&D Prototyper

KArts ATLab (Seoul, South Korea)

🔗 Official Trailer

- Led AI + spatial storytelling R&D, prototyped a multimodal AI narrative system using GPT, ElevenLabs and gaze-based user context to explore personalised real-time interaction in VR.
- Developed the generative VR film 8pm and the cat in Unity, collaborating with artists and directors to translate R&D into an immersive cinematic experience selected for Venice Immersive 2025 and BFI London 2025.

Unity Engine (C#) OpenAI Stable Diffusion ElevenLabs Meta Quest

4/2022 – 1/2025

HCI Researcher, VR Developer

Goldsmiths University of London | LASALLE College of Arts(Singapore)

🔗 Frontiers paper link 🔗 IEEE VR 2023 poster link

- Built a Unity-based VR public-speaking research prototype for Meta Quest, implementing customizable training scenarios to study repeated exposure and foreign-language anxiety.
- Evaluated the system with 40+ participants, contributing to experimental design, data collection and analysis; secured a £10,000 research grant and published findings in Frontiers in Virtual Reality, with presentation at IEEE VR 2023.

Unity Engine (C#) Meta Quest Python SPSS

4/2023 – 9/2023	Creative Technologist 🔗 Memory Journey Project Video 🔗 Memory Journey Project Website - Developed the Dream Archive Project, an AI-powered immersive installation supported by the Korean government's Art and Technology Convergence Project. - Integrated OpenAI-based creative workflows into an interactive installation presented publicly at Musinsa Studio Hannam. AWARDS & RECOGNITION

7/2026	XRCC 2026 Runner Up 🔗 Project Details Finalist from 200+ submissions at XRCC 2026 for <i>PinPoint</i> , a Snap Spectacles-based spatial retail system	
6/2026	Reality Hack at AWE 2026 Finalist 🔗 Project Details Finalist at Reality Hack at AWE 2026 for <i>Mattery</i> , a Snap Spectacles-based spatial AI education app	
8/2025	Venice Immersive 2025 BFI London Film Festival Expanded 2025 BIFAN 2026 Official Selection 🔗 Project Details Official selection for <i>8pm and the cat</i> .	
10/2024	Guest Lecture on Game Design (Catholic University of Korea) Lectured on game ideation, development processes, and XR case studies for undergraduate students	
9/2024	2024 Metaverse Developer Contest (Seoul, South Korea) 🔗 Project Walkthrough Video Winner of 2024 Metaverse Developer Contest, awarded by the Korea Metaverse Industry Association (submission out of 349 teams)	
1/2023 – 9/2024	Goldsmiths-LASALLE Partnership Innovation Fund Received £10,000 funding for VR research on reducing foreign-language anxiety	
9/2020 – 10/2020	Travel the World (Incheon, South Korea) 🔗 Exhibition Details Solo exhibition in Incheon, South Korea, demonstrating digital travel illustrations
